Star Breathing

Start at any "Breathe in" side, hold your breath at the point, then breathe out.
Keep going until you've gone around the whole star.

Guided Meditation: The Balloon

This guided meditation brings a visual component to a very simple deep breathing exercise. You can do this standing or seated.

1. Relax your body and begin to take deep inhales and slow exhales through the nose.
2. Start to take a slow, deep breath to fill your belly up with air, as if you're trying to blow up a big balloon. Expand your belly as much as you can.
3. Slowly let the air out of the balloon (through the nose) as you release the breath from the belly.
4. Encourage your kids to feel their entire body relax each time they exhale, each time air is slowly being released from the balloon. You can even make a "hissing" noise to encourage them to slow down the exhale even more, "Like letting air out of the balloon."
5. Continue for several minutes.

9 Ways to Handle Big Emotions

Muscle Relaxation: Spaghetti Noodle

This exercise is a fun way of guiding children through muscle relaxation techniques.

1. Imagine you are a spaghetti noodle before it goes in the pot of hot water. What does it look like?
2. Tense up and squeeze all your muscles, stay straight like a noodle!
3. Now imagine you're in the pot of hot water. What does the noodle look like now?
4. Relax your muscles so you look like a cooked noodle.
5. Repeat several times.

Grounding Exercise: 5 Senses

Name **5** things you can see

Name **4** things you can feel

Name **3** things you can hear

Name **2** things you can smell

Name **1** thing you can taste
