What You Need

Math Masters, page G34

\$1, \$10, and \$100 bills

two 6-sided dice

What To Do

Take turns with your partner.

- 1 Place all \$1, \$10, and \$100 bills in the Bank.
- 2 For each turn, roll two dice and add the numbers together.
- 3 Take that many dollars from the Bank and place them on the \$1 section of your game mat.
 - As you get more dollars, trade in the bills when you can.
 - Trade in ten \$1 dollar bills for a \$10 bill.
 - Trade in ten \$10 bills for a \$100 bill.
- 4 The first player to trade for the \$100 bill is the winner.

Talk About It

How many \$10 bills make \$100?

How is a \$1 bill like a penny?

What other bills do we have that are less than \$100?

How long did it take to get to the \$100 bill? About how long do you think it would take to get to \$1,000?

More You Can Do

Start with \$10 bills and play to \$1,000.

I need two more \$10 bills to trade in for a \$100 bill.
