

# Using Inverse Operations to Solve Equations

## Lesson 6-9

DATE

TIME

Use inverse operations to solve these equations. Show each operation. Check your work.

1  $4,509 = x - 748$

Check:

2  $\frac{y}{7} = 18$

Check:

3  $5.75 = d + 0.29$

Check:

4  $1\frac{2}{3} = 5k$

Check:

5  $18 = 5s$

Check:

6  $3\frac{1}{8} = m - 2\frac{1}{4}$

Check:
