

Complementary Colored Hearts

The 3 Primary Colors

Red
Yellow
Blue

The 3 Secondary Colors

Orange
Green
Purple

What colors complement each other?

Remember, they are opposite of each other on the color wheel!

Above is an example of a finished Complementary Colored Hearts project

Directions: Start with the box in the top left corner. Choose which set of complementary colors you want to start with. In the example, it is orange and blue. Inside the first line, it is colored orange, but the area inside of the heart is colored blue. The next line is the exact opposite. The outside is colored blue but inside the heart is colored orange. You continue with that pattern until the entire area is colored.

****When you are finished, *if you would like*, you can take a picture and send it to Mrs. Pisarik with your name and age. There's a chance that it could be posted on the Farley Elementary Facebook Page! You could also hang it in your window at home and share it on Facebook Heart Hunters (<https://www.facebook.com/groups/326431341651785/>).

Mrs. Pisarik's email: Emily.pisarik@wdbqschools.org
