

# Western Dubuque Community School District:

## Right to waive technology access

Students in grades 6 through 12 are being provided with a district computer, carrying case, and power adapter. This equipment is the property of Western Dubuque Community School District. The guardian of the student has the right to waive their access to this technology. By waiving your right to access this technology the student(s) will not be allowed to take any district technology off site. When computer access is needed, student(s) will need to check out a device during said class period or use the building's computer lab.

\_\_\_\_\_ I waive the right of access to the district provided computer, carrying case, and power adapter.
