

- 1 Shade a rectangle to represent $\frac{2}{3} * \frac{5}{6}$.

$$\frac{2}{3} * \frac{5}{6} = \frac{10}{18}$$

- 2 Solve.
 $6 \div \frac{1}{3} = \underline{18}$

- 3 Write the following numbers in order from greatest to least.

0.38 0.308 3.08 3.38 0.038

3.38 3.08 0.38

0.308 0.038

- 4 Fill in the blank with $<$, $>$, or $=$.

a. $15 * \frac{2}{3} \underline{<} 15$

b. $15 * \frac{12}{6} \underline{>} 15$

c. $15 * \frac{18}{18} \underline{=} 15$

- 5 **Writing/Reasoning** Explain how you solved Problem 4c.

Sample answer: I know that when you multiply a number by a fraction equal to 1, the product is the same as the other factor.
 $\frac{18}{18}$ is equal to 1, so the product is 15.
